

COMPANY PROFILE

INDUSTRIAL SEALING, INSULATION & PTFE SUPPLY

A direct-sourcing supplier of gland packings, jointing sheets, PTFE components, high-temperature insulation and process instrumentation to Pakistan's mills, plants and process industries.

WHO WE ARE

10+ YEARS IN SUPPLY	63 CATALOGUED PRODUCTS	15 PRODUCT CATEGORIES	12 INDUSTRIES SERVED
-------------------------------	----------------------------------	---------------------------------	--------------------------------

Al-Hamd Traders supplies the sealing, insulation and PTFE components that keep heavy industry running — gland packings for pumps and valves, jointing sheets for flange joints, machined PTFE parts, high-temperature insulation for furnaces and boilers, and the pressure and temperature instrumentation that monitors those same systems.

We have supplied Pakistani industry for over a decade from our base on Brandreth Road, Lahore. What began as a trading business in gaskets and packing now runs as a structured, 63-line catalogue organised by material family and application.

Our operating model is deliberately simple: **source directly from manufacturers, specify the material correctly, and deliver against the plant’s downtime window.**

COMPANY INFORMATION

TRADING NAME	Al-Hamd Traders
BUSINESS TYPE	Supplier of industrial sealing, insulation, PTFE, rubber and instrumentation products
YEARS IN OPERATION	Over 10 years supplying Pakistani industry
HEAD OFFICE	28 Brandreth Rd, Ram Gali Naulakha, Lahore 54000, Punjab, Pakistan
SUPPLY COVERAGE	Nationwide across Pakistan by road freight
RANGE OF SUPPLY	63 catalogued products across 15 categories
TELEPHONE / WHATSAPP	+92 321 4445067
EMAIL	info@alhamdtrader.com
WEBSITE	alhamdtrader.com
QUOTATION TURNAROUND	Within one business day of a complete enquiry
TAX REGISTRATION	NTN / STRN furnished on request, stated on all invoices
MATERIAL DOCUMENTATION	Manufacturer specification sheets and food-grade / FDA-compliance documentation on request
PAYMENT & CREDIT TERMS	Agreed at quotation stage

RANGE OF SUPPLY

Sixty-three catalogued products across fifteen categories. Every line is published with its material composition, temperature and pressure ratings, dimensions and chemical compatibility — so a specification can be checked before an order is raised. Sizes outside the standard range are quoted to drawing.

GLAND PACKINGS

13 PRODUCTS

- Graphite Gland Packing
- Graphite Packing with Inconel Wire
- Pure PTFE Gland Packing
- Acrylic PTFE Packing
- Aramid Gland Packing
- Aramid Heat Resistant Thread
- Carbon Fiber Packing
- Asbestos Graphite Packing
- Asbestos Teflon Packing
- Mica Packing
- Ammonia Packing
- Cotton Grease Packing
- Jute Packing

PTFE PRODUCTS

6 PRODUCTS

- PTFE Rods — machined to drawing
- PTFE Sheets
- PTFE Coated Fiberglass Fabric
- PTFE Mesh Conveyor Belt
- PTFE Joint Sealant
- PTFE Thread Seal Tape

INSULATION PRODUCTS

5 PRODUCTS

- Ceramic Fiber Wool
- Ceramic Fiber Tape
- Ceramic Board
- Ceramic Paper
- Glass Wool

JOINTING SHEETS

2 PRODUCTS

- Non-Asbestos Jointing Sheet
- Asbestos Jointing Sheet

HEAT PROOF CLOTH

4 PRODUCTS

- Ceramic Fiber Cloth
- Aluminium Coated Fiberglass Fabric
- Silicone Coated Fiberglass Fabric
- Vermiculite Coated Silica Cloth

FIBERGLASS PRODUCTS

3 PRODUCTS

- Glass Cloth
- Glass Rope
- Glass Tape

RANGE OF SUPPLY — continued**RUBBER PRODUCTS****6 PRODUCTS**

- Rubber Sheet — NBR, EPDM, Neoprene
- Silicone Rubber Sheet
- Rubber Pad
- Rubber Strip
- Rubber Emery Fillet
- Foam Rubber Tape

PVC STRIP CURTAINS**6 PRODUCTS**

- Transparent PVC Curtain
- Double Ribbed PVC Curtain
- Welding Grade PVC Curtain
- Anti-Insect PVC Curtain
- Freezer-Grade Strip Curtains
- Stainless Steel Curtain Fittings

ASBESTOS PRODUCTS**4 PRODUCTS**

- Asbestos Board
- Asbestos Cloth
- Asbestos Rope
- Asbestos Tape

PRESSURE & TEMPERATURE GAUGES**3 PRODUCTS**

- WIKA Pressure Gauges
- Pressure Gauges — economy grade
- Temperature Gauges

GAUGE GLASS**3 PRODUCTS**

- Reflex Gauge Glass
- Plain Gauge Glass
- Sight Glass

GLASS TUBES**1 PRODUCT**

- Borosilicate Glass Tube

RANGE OF SUPPLY — continued

INDUSTRIAL FELTS

3 PRODUCTS

- Wool Felt
- Polyester Felt
- Non-Woven Geotextile Felts

FILTER CLOTHS

2 PRODUCTS

- Rotary Filter Cloth
- Polyester Wadding Filter

WOVEN BRAKE LININGS

2 PRODUCTS

- Non-Asbestos Woven Brake Lining
- Asbestos Woven Brake Lining

CUT & MACHINED TO ORDER

MADE TO DRAWING

- PTFE rod, sheet and bush turning
- Gaskets cut to flange drawing
- Jointing sheet cut to size
- Curtain sets cut to doorway opening

SPECIFICATION STANDARDS REFERENCED

Materials are supplied against the recognised test and specification standards below. These standards describe the materials and the methods used to test them; manufacturer specification sheets are provided on request so a buyer's QA team can verify compliance independently.

ASTM D4894

PTFE resin

ISO 13000-2

PTFE semi-finished

ISO 12086

Fluoropolymer

FDA 21 CFR 177.1550

Food-contact PTFE

ASTM F36

Gasket compressibility

ASTM F38

Gasket creep relaxation

ASTM F104

Gasket classification

ASTM D315

Packing & braid

ASTM D2240

Rubber hardness

ASTM D412

Rubber tensile

ASTM C201

Refractory thermal

ASTM E136

Non-combustibility

DIN 7081

Gauge glass

DIN 53482

Electrical resistance

UL 94 V-0

Flammability

ISO 16890 / EN 779

Filter media

INDUSTRIES WE SUPPLY

The catalogue is organised around the failure points these industries actually report — abrasive slurry destroying pump packing, steam leaking at valve glands, flange gaskets blowing out, heat lost from bare surfaces, and filter media blinding.

<p>Textile Mills</p> <p>Dye-line seals, steam line insulation, gauge glass, lint filtration</p>	<p>Sugar Mills</p> <p>Juice and mud pump packing, boiler-side sealing, juice heater insulation</p>	<p>Paper Mills</p> <p>Abrasive stock packing, dryer-section insulation, filter cloth</p>
<p>Power Plants</p> <p>Valve and gland sealing, boiler gauge glass, flange gaskets, turbine line insulation</p>	<p>Cement Plants</p> <p>Kiln and preheater insulation, dust-duty seals, high-temperature gaskets</p>	<p>Steel Plants & Foundries</p> <p>High-temperature cloth, ceramic insulation, heat-resistant packing</p>
<p>Chemical Plants</p> <p>PTFE and graphite packing, chemically resistant jointing sheet</p>	<p>Oil & Gas</p> <p>Valve packing, flange sealing, pressure instrumentation</p>	<p>Pharmaceutical</p> <p>Food/FDA-grade PTFE, clean-service seals, documented materials</p>
<p>Food Processing</p> <p>FDA 21 CFR 177.1550 PTFE, freezer-grade curtains, hygienic seals</p>	<p>HVAC & Building Services</p> <p>Glass wool and ceramic insulation, duct sealing, strip curtains</p>	<p>Engineering Workshops</p> <p>Machined PTFE parts, rubber sheet, gaskets cut to drawing</p>

Where an application sits across two of these — a food-contact seal that also runs hot, or a chemical duty that is also abrasive — send the operating conditions rather than a part number. Specifying from conditions is what prevents the wrong grade arriving on site.

WHY BUYERS SOURCE FROM US

Direct Manufacturer Sourcing

We buy from manufacturers rather than from resellers of resellers. That removes a margin layer and, more importantly, removes the lead-time uncertainty that comes with one.

Technical Specification Support

Send the operating conditions — pressure, temperature, medium, shaft speed, chemical exposure — and we will specify the material. Where two grades both work, we say which is cheaper and which lasts longer.

One Supplier, Fifteen Categories

Packing, jointing sheet, insulation, PTFE, rubber, curtains, filtration and gauges from a single vendor record — one PO, one delivery and one point of contact instead of seven.

Published, Checkable Specifications

Every catalogue line carries its material composition, temperature and pressure ratings, dimensions and chemical compatibility. A specification can be verified before a purchase order is raised, not after delivery.

Delivery Against Your Shutdown

Stocked categories despatch quickly; specified and bulk orders are scheduled to the plant’s downtime window rather than to our convenience.

Documentation on Request

Manufacturer specification sheets and food-grade / FDA-compliance documentation are supplied with the quotation where the material carries them, for QA and audit files.

DELIVERY COVERAGE

Despatch is from Lahore by road freight to all major industrial centres. Freight cost and transit time are stated on the quotation, so the landed cost is known before the order is placed.

Lahore	Karachi	Islamabad	Rawalpindi	Faisalabad	Multan	Sialkot
Gujranwala	Peshawar	Quetta	Hyderabad	Sukkur	& all other industrial districts	

HOW TO RAISE AN ENQUIRY

Quotations are issued within one business day of a complete enquiry. The single largest cause of delay is an incomplete specification, so the steps below set out exactly what we need.

- 01

Send the enquiry

By email to info@alhamdtrader.com, by WhatsApp or call to **+92 321 4445067**, or through the enquiry form at alhamdtrader.com. A drawing, a photograph of the failed part, or the previous supplier's part number — any one of the three is enough to start.
- 02

Include the operating conditions

Material or product name; size, thickness or dimensions; quantity and unit; operating temperature and pressure; the medium being sealed or filtered; and the required delivery date. Where the specification is uncertain, send the conditions and we will specify the material.
- 03

Receive the quotation

Issued within one business day, stating the material grade and specification, unit rate, total, lead time and despatch basis. Where an alternative grade would be more economical or longer-lasting, both options are quoted side by side.
- 04

Place the purchase order

Confirm against the quotation reference. Payment and credit terms are agreed at this stage. Our NTN and STRN are furnished on request and stated on every invoice.
- 05

Despatch and documentation

Goods despatched by road freight with the invoice and, where the material carries them, the manufacturer specification sheet and compliance documentation for your QA file.

TECHNICAL RESOURCES FOR YOUR ENGINEERS

PRODUCT CATALOGUE	All 63 products with full published specifications — alhamdtrader.com
SOLUTION WIZARD	Guided material selection from operating conditions — pressure, temperature and chemical exposure
TECHNICAL CALCULATORS	Gland packing sizing, chemical compatibility lookup and insulation thickness estimation
RESOURCE CENTRE	Material selection guides and application notes by industry

REQUEST A QUOTATION

Send a specification, a drawing, or simply the operating conditions. We respond within one business day.

TELEPHONE & WHATSAPP

+92 321 4445067

Technical enquiries and quotations. WhatsApp accepts drawings and photographs of failed parts.
